# Infection Prevention and Control

(4939)

## COURSE DESCRIPTION

The Infection Prevention and Control online training course has been designed to give you a practical understanding about how to prevent, control and manage infection when providing healthcare and supporting services. Following successful completion of this course, it is expected that learners will have a greater understanding of how to minimise the risk of infection when carrying out day-to-day healthcare tasks as well as learn the proper disposal and handling methods of numerous medical appliances.

The prevention of infection is not only essential in health and safety environments but in all areas, that contain many people. The skills gained from doing this course will be of benefit to any organisation that wants to keep its staff healthy and productive.

## Learning Outcome

In addition to the skills and knowledge gained in the course, the learner will understand:

- What a Healthcare Associated Infection (HCAI) is and how it's transmitted
- The principles of infection prevention and control
- Current hand hygiene procedures
- Learning the proper way to handle and dispose of sharp medical instruments
- Learning how to use, handle and clean equipment
- Understanding different ways to minimise the risk of infection posed by care support workers

## Course Features

- Adaptics - Kineo's unique approach to refresher training
- professional audio
- animation and interactivity
- WCAG 2.0 accessibility
- mobile compatibility
- formative assessments, and
- a certificate of completion.

## Audience and Duration

The course is designed for all health and social care staff.

Duration: 125 minutes
