Safe Medication Management

(33654)

COURSE DESCRIPTION

The course is designed for qualified nurses and midwives whose scope of practice **does not** include the administration of intravenous (IV) therapy.

This Safe Medication Management course is designed to provide relevant health professionals with training in safe administration of medication.

The safe administration of medication is a crucial skill and key professional development in healthcare.

Administering medication is an obviously important task. The goal of this course is to provide suitably qualified nurses and midwives with an understanding of best practice for safe medication management, medication administration and medication calculation. Improve Patient Safety by Eliminating Medication Errors

Learning Outcome

Following completion of this course, you should be able to:

- an understanding of their responsibility to safely administer medication and reduce the risk of a medication or adverse drug event occurring
- the ability to identify key risk points in the medication administration process, as well as implement strategies to reduce these risks, and
- accurately calculate drug and medication dosages – including tablets, mixtures and solutions.

Course Features

- Adaptics - Kineo's unique approach to refresher training
- professional audio
- animation and interactivity
- WCAG 2.0 accessibility
- mobile compatibility
- formative assessments, and
- a certificate of completion.
