# Understanding Dementia Suite of Modules

## Course Description

This suite of modules has been designed to increase the learner's understanding of life with dementia and its impact. It also provides behavioural training in how to care for and support people living with dementia. It provides training on how to communicate effectively with people living with dementia. It also provides behavioural training in how to care for and support people living with dementia. Provides an understanding that Person-centred care is treating someone as a person first. It means providing care in a way that is specific to them by taking into account their unique wants, needs, likes, dislikes, strengths and weaknesses.

This online learning course is designed to align with the Aged Care Quality Standards. It has been developed in collaboration with experts, including Kineo clients working in the aged care sector, to ensure the course is fit-for-purpose.
